

Annual Report 2018-2019

Mikinduri site:
Mikinduri, Kenya

Our site oversees the sponsorship of children, as well as a farming program which allows them to produce food on school land and provide the children a daily noon meal. A nutritionist monitors the community and provides training in food preparation, dietary requirements, and sanitation. In addition to sponsorship, the site provides adult literacy classes, health workshops, and demonstrations of farming methods to improve food security.

Education

Goals

1. To reduce the number of young children who drop out of school.
2. To prevent early marriages and teen pregnancies.
3. To ensure a smooth transition for students from secondary school to university and colleges.

Achievements

1. This year 11 children sat their Kenya Secondary School Education examination. Four will join university, two will join colleges and five will join technical institutions.
2. Through close monitoring and follow up, academic performance has drastically improved.
3. Established school feeding to increase enrollment of children in school, reduced absenteeism and improved retention.
4. We held several training and counseling sessions which led to a decrease in school dropouts, early pregnancies and marriages.

Health & hygiene

Goals

1. To prevent lifestyle diseases and diseases caused by unhygienic practices.
2. To control and monitor the families in purchase of nutritional food products and feeding practices.
3. Achieve zero cases of malnutrition in the families.

Achievements

1. Created awareness on drugs and drug substance abuse.
2. We have recorded an improvement on behavior change and building self-confidence amongst our children.
3. Taught life skills which entails decision making, self-awareness and communication skills to the children, stress and stress management.
4. Provided spiritual guidance and sharing the love of Christ with others.
5. Encouraged personal and general hygiene.
6. Provided nutrition education.

Nutrition

Goals

1. To achieve food security amongst our families and community.
2. To eradicate poverty through adoption of modern farming methods.
3. Full adoption of "farming in God's way" amongst our families as opposed to conventional farming that they practice.

Achievements

1. 25 farmers received training on conservation agriculture. We hope for increased production of safe food.
2. A demonstration plot was established with different conservation agriculture technologies both at the school farms and land leased by the site for community learning.
3. Recruited 20 farmers from different site groups have been completed and registered. 25 pupils have been recruited in each school to form a 4K club.
4. Our drip kit has been fixed with all the relevant equipment, trials have been done and the system is ready for use. Training on safe handling has also been done. This will be a good platform for the community to learn.

Community

Goals

1. To empower families to manage their money well.
2. Enable families to be self-reliant.
3. To assist Family Circles to come up with group economic viable projects.

Achievements

1. A number of parents have been able to purchase small plots of land to build shelters and do subsistence farming.
2. Others have been able to lease land for farming to sustain the dietary needs of their families.
3. Some parents have started small businesses.
4. Others have been able to buy domestic animals, which help them to supplement their family basic needs.

Family

Goals

1. To instill good parenting skills to our families.

Achievements

1. Families are now aware about the importance of hygiene and child education.
2. There's been improvement on children's discipline.
3. Parents have been more responsible.
