

Our Wa site works to support families so that they can access quality education, health care, and satisfy their spiritual and nutritional needs. Our site also supports the general development of the communities by providing equal opportunities to families living in poverty and addresses prevention and treatment of Hepatitis B.

Education

Goals

1. To provide fruit trees to all of our schools. This will allow the school to provide children with well balanced meals.
2. To provide more furniture to our schools that are still in dire need of desks and chairs.

Achievements

1. We organized academic competitions for schools to encourage the children develop a strong interest in academic work.
2. We provided textbooks for one school and library shelves for the school to store the books.
3. We bought dining hall tables and benches for one of our schools. The children used to eat their meals outside. They now have the opportunity to sit and have a meal.

Health & hygiene

Goals

1. To continue the yearly renewal of sponsored families' health insurance. This will enable them to have free health care in times of needs.
2. To test and vaccinate school children for Hepatitis B.

Achievements

1. All sponsored children have their insurance renewed for the period.
2. We were able to organize a stakeholder meeting on malnutrition with some community leaders.
3. Organized clean up exercises at public places such as markets and health centres.

Nutrition

Goals

1. To expand our school farms to ensure that school children are fed every day.
2. To cultivate vegetables for all schools under the school feeding program through dry season gardening.

Achievements

1. We have successfully expanded our school farming project to **three** more schools.
2. We were able to provide meals for children at **two** schools at least three times a week.
3. We were able to supply rice to needy and physically disabled individuals.

Community

Goals

1. To organize training on entrepreneurial skills for all parents.
2. To organize a training workshop on best agricultural practices.
3. To build a shea nut oil extraction centre for quality shea butter production.
4. To construct boreholes for some communities.

Achievements

1. We were able to repair one of our roads that is not passable during the raining season.
2. We built a urinary pit for the parents at the Credit Union.
3. We organized Christmas parties for all sponsored children.
4. We provided some groups with additional cash to increase their capital for group projects.
5. We supported some schools with mango seedlings to help them protect their school environment

Family

Goals

1. To provide veterinary services for families who are keeping farm animals in one community to prevent the frequent deaths of their animals.
2. To provide fruit trees for families who desire to venture into cash tree planting.

Achievements

1. We supported some families with cash to expand their small businesses.
2. We gave some families fruit trees to plant for income generation.
3. We provided rice to families in need during Christmas.

Family funding

Goals

1. To provide training for parent group executives and facilitators.
2. To provide further training on group project management and managing of group loans.
3. To educate parents on Chalice programs for better understanding of the site activities.

Achievements

1. We have successfully initiated parent group joint projects for community development. Parents come together to support their communities in times of need.
2. All parents' groups have been able to raise more money and all now have group projects.
3. We were able to supply an oven to one group and train the parents on bread baking.
