

Our site works to provide quality education to deaf children, children from poor families, and children with intellectual disabilities. Most of these children board at the schools they attend. The site also provides skill-building workshops such as animal rearing and food preparation, business training for women, and sign language training.

Education

Goals

1. To support St Don-Bosco and Wa School for the Deaf with more learning materials for skills training and development of the children.
2. To encourage and support **10** additional older youth who have completed high school and wish to pursue post-secondary education.

Achievements

1. Meetings and words of encouragement by site staff to both parents and children led to **three** children enrolled in universities, **three** in teacher training colleges, **three** in polytechnics, **one** in nursing training college and **11** in other skills training institutions.
2. Children at St Don-Bosco were trained on soap and parazone making.
3. Our site now has a better collaboration with the Catholic education unit, the regional director of education and the school management committee.

Health & hygiene

Goals

1. To provide national health insurance cards to children and parents for easy access to health facilities.
2. To support preventive health education to prevent diseases.

Achievements

1. Food supplements provided ensured that no child reported sick during the year.
2. A non-sponsored child was successfully treated using critical needs funds after being involved in a motor accident.

Nutrition

Goals

1. To support Wa School for the Deaf and St Don-Bosco with supplementary food for school meals.
2. To support parents with training for modern farming methods.

Achievements

1. Thanks to the support from Chalice's nutrition program, there are no longer food shortages at both Don-Bosco and Wa School for the Deaf.
2. An evaluation indicated that no single child was diagnosed as malnourished over the year.
3. Sponsored families were able to produce more food due to the farming support received from our site.

Community

Goals

1. To support the WaDeaf clinic with beds and other hospital equipment.
2. To drill mechanized boreholes for all season farming at Wa School for the Deaf and the Sagu community.

Achievements

1. St Don-Bosco now has enough clean drinking water.
2. A community hall and offices were successfully completed for group meetings.
3. The site, together with WaDeaf school authorities, were able to build a clinic for the school.

Family

Goals

1. To organize a small-scale business forum for our sponsored families.
2. To encourage all families to save more than \$125 CAD per year.

Achievements

1. More than half of the families have savings more than \$125 CAD in their bank accounts.
2. Families are now responsible for paying their schools fees and other basic needs.
3. The collaboration of the site and the credit union made it possible for all groups to obtain personal and groups loans to start small businesses.

Family funding

Goals

1. To establish a shea butter factory for family circles to process of shea butter for extra income.
2. To register all family circles with the District Assemblies for effective businesses.

Achievements

1. Our site has assisted children with hearing impairments and children with learning disabilities with learning materials for vocational and skills training activities.
2. Family circles and individual families are starting many small businesses.
3. Individual parents who are skillful in small businesses teach their methods to groups members and to other family circles.
